# 3D WOODEN MODEL

Toddler Toys Collection

# Brigantine Ship

**Assembly Guide | SKU: TT_38**

**www.wowwe.co.za**

# BEFORE YOU START

**Read this page first. It only takes a minute.**

## Go gently: this is wood, not plastic.

Your kit is laser-cut from wood board. It is strong once put together, but thin parts can snap if you force them.

**Test-fit first.** Push each piece into place without glue to see how it goes. If a joint is tight, sand it lightly; never hammer or twist it in.

**Use ordinary wood glue** (white PVA glue). A small dab in each joint is enough.

**Clean the edges.** Wipe off laser burn marks with a slightly damp cloth or an alcohol wipe.

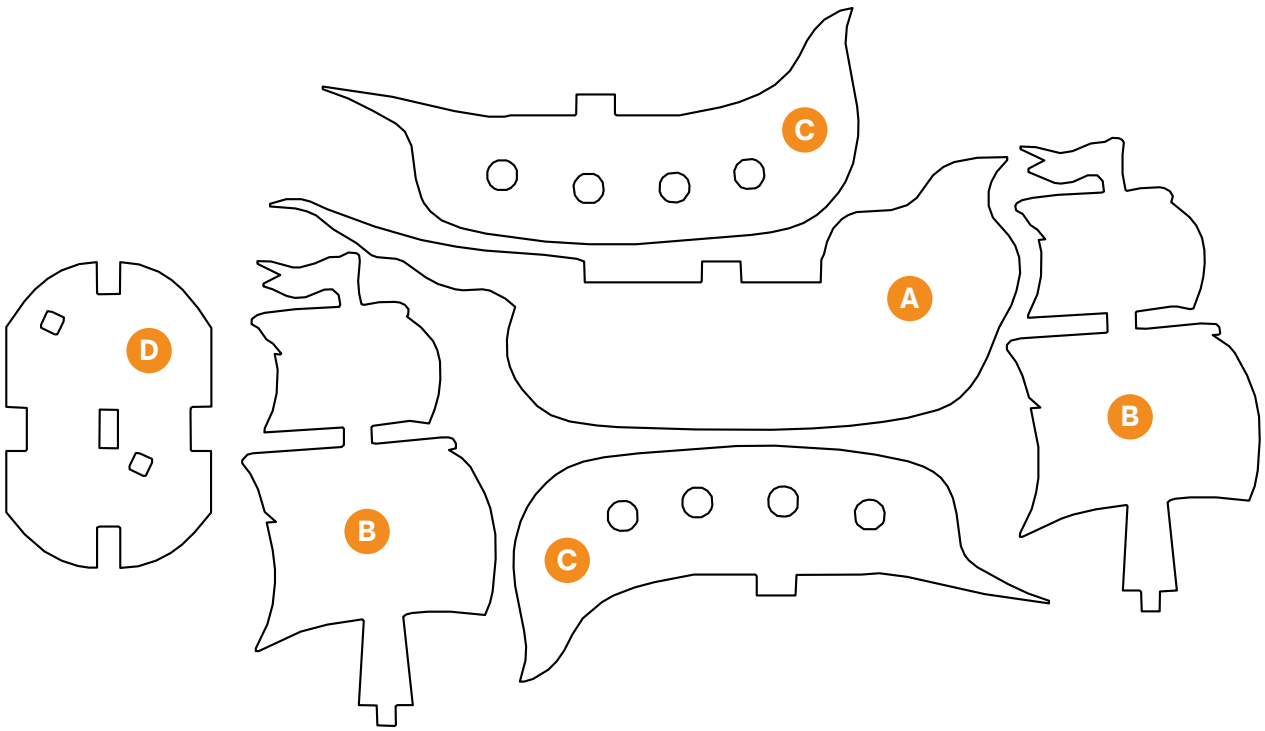
**Grown-ups build, little ones play.** An adult should put this model together. Keep loose pieces away from small children until the glue is completely dry.

**Make it yours.** Paint it with child-safe paint and seal it with a clear wood sealer so it lasts.

**You will need:** wood glue • fine sandpaper • a damp cloth • child-safe paint (optional)

# WHAT'S IN THE BOX

**Check that you have all 6 pieces before you start.**



- **A** Piece A × 1
- **B** Piece B × 2
- **C** Piece C × 2
- **D** Piece D × 1

Each letter in the drawing shows which piece is which.

# STEP 1

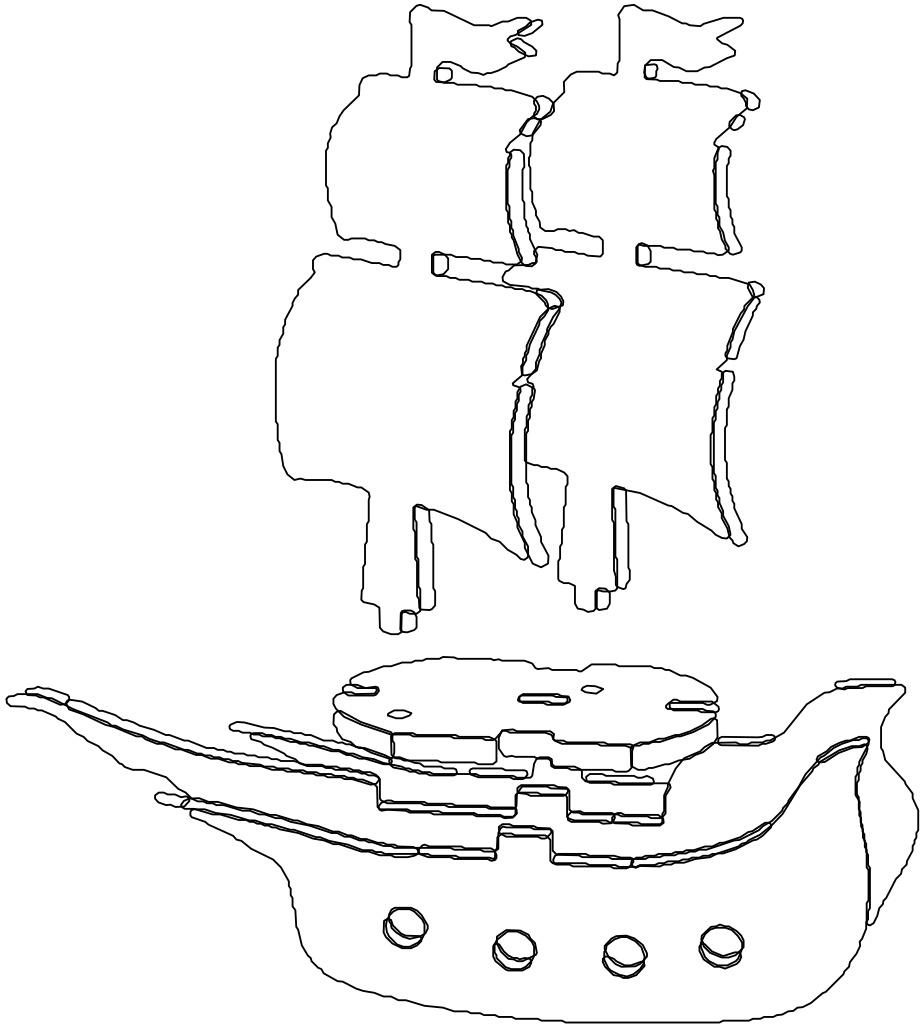
## Build your model

1. **Test-fit first**
   Slot the pieces together without glue, the way the drawing shows, to see where each one goes.

2. **Glue and assemble**
   Take them apart again, put a small dab of wood glue in each slot and push the pieces back together.

3. **Let it dry**
   Wipe away any glue that squeezes out and leave the model on a flat surface for a few hours (overnight is best).

4. **Decorate (optional)**
   Paint it with child-safe paint, then add a clear sealer.



# ALL DONE!

**Your Brigantine Ship is ready to play.**

**Need help or missing a piece?** Visit **www.wowwe.co.za** and get in touch. We love seeing your finished models, so share a photo with us!
