

3D WOODEN MODEL

Toddler Toys Collection

Falcon

Assembly Guide | SKU: TT_10

www.wowwe.co.za

BEFORE YOU START

Read this page first. It only takes a minute.

Go gently: this is wood, not plastic.

Your kit is laser-cut from wood board. It is strong once put together, but thin parts can snap if you force them.

No glue needed. The pieces slot into each other. Line the slots up and push gently; if a joint is tight, sand it lightly. Never hammer or twist a piece in.

Want it to stay together? Add a small dab of ordinary wood glue (white PVA glue) in each slot.

Clean the edges. Wipe off laser burn marks with a slightly damp cloth or an alcohol wipe.

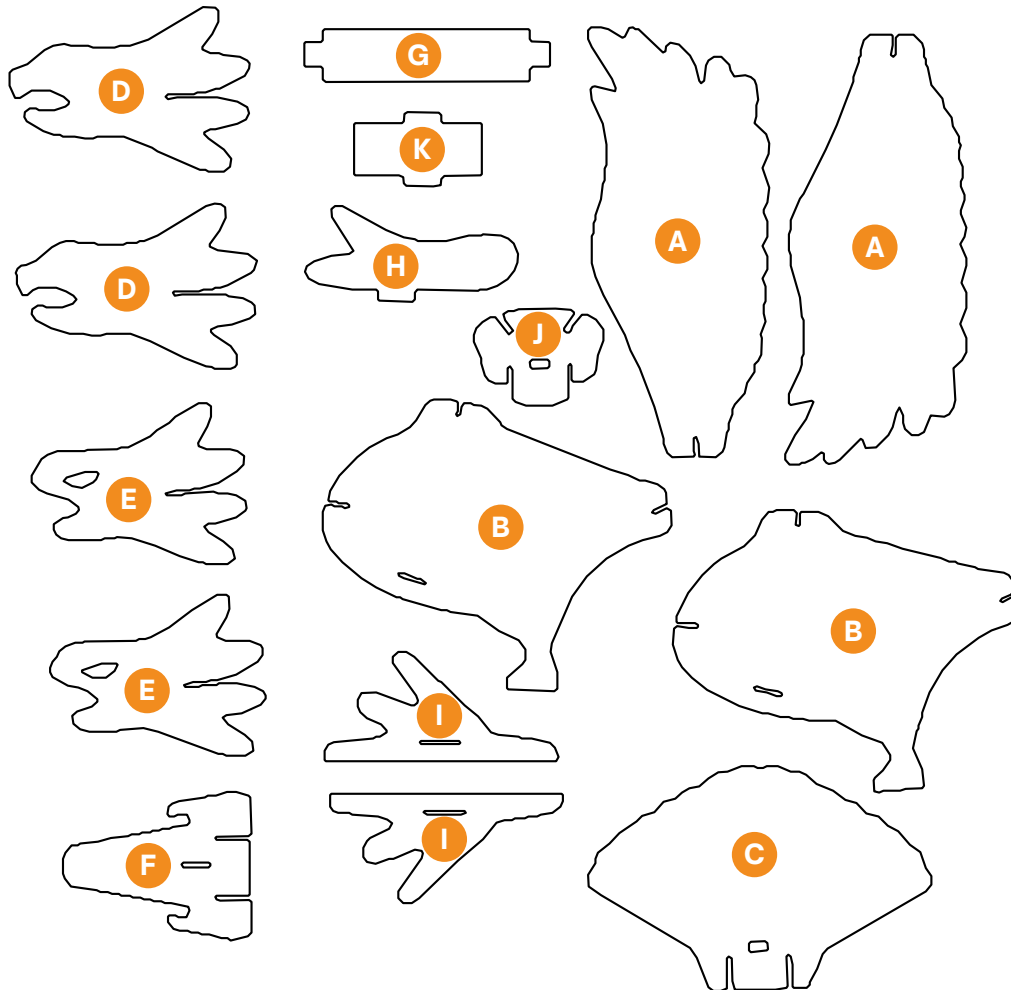

Grown-ups build, little ones play. An adult should put this model together. Small pieces can be a choking hazard, so keep them away from very young children.

Make it yours. Paint it with child-safe paint and seal it with a clear wood sealer so it lasts.

You will need: your hands • fine sandpaper • a damp cloth • wood glue and paint (optional)

WHAT'S IN THE BOX

Check that you have all 16 pieces before you start.

- A** Piece A × 2
- B** Piece B × 2
- C** Piece C × 1
- D** Piece D × 2
- E** Piece E × 2
- F** Piece F × 1
- G** Piece G × 1
- H** Piece H × 1
- I** Piece I × 2
- J** Piece J × 1
- K** Piece K × 1

Each letter in the drawing shows which piece is which.

STEP 1

Build the first part

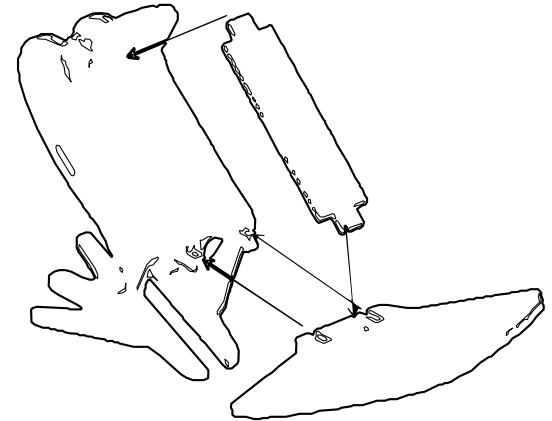

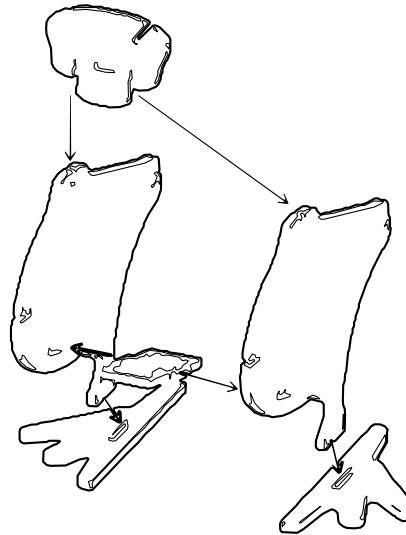

1 Sort the pieces

Lay all the pieces out and match them to the letters on the parts page.

2 Follow the arrows

Each arrow shows where a piece slides in. Line up the slots and push the pieces together so the slots lock into each other.

STEP 2

Add the rest

3

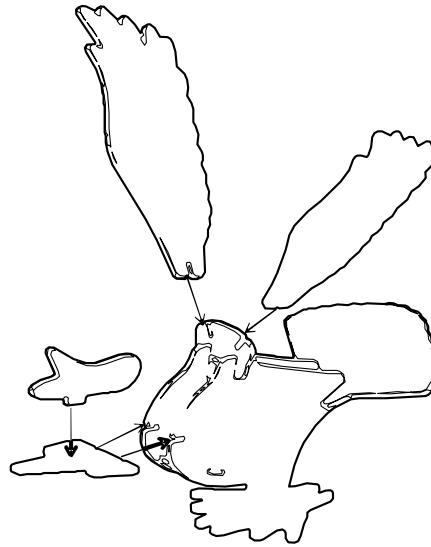

Keep going

Follow the arrows on this page to fit the remaining pieces, sliding slot into slot.

4

Check it stands

Push every joint all the way in, then stand the model on a flat table. If it wobbles, press the pieces in a little further.

ALL DONE!

Your Falcon is ready to play.
